

NEW! "METALLIC COLORS"

Special-Effect Color MB for Injection Molding

A close look at the trendy automotive manufacturing industry, shows that design features are extremely challenging, becoming increasingly sophisticated and customized.

The high-quality design of products continues to gain importance in many areas, even beyond the automotive market. Obviously colors are playing a significant role in the design process.

Tosaf Color Service has developed a range of special-effect color MB offering a cost-saving and eco-friendly alternative to complex tones and hues, which can be adapted to your individual color requirements.

ADVANTAGES OF METALLICS:

- High quality surface appearance
- Cost saving
- Reduced number of processing steps
- Protection of environment
