COLORS FOR THE  
PLASTICS INDUSTRY**

# COLOR MASTERBATCH SOLUTIONS

## ABOUT TOSAF

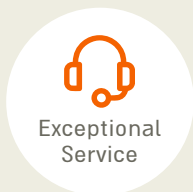

For over three decades, Tosaf has been developing and manufacturing high quality additives, compounds and color masterbatches for the plastics industry with the aim of providing for our customers' every need.

We have continuously grown and developed our offering, production capacity, and global reach, becoming a truly close to the market,

### GLOBAL ORGANIZATION

Servicing customers in over 50 countries in Europe, North America, South America, Asia and the Middle East, Tosaf has over 1000 employees spread throughout our production sites, warehouses, sales and distribution offices around the world.

Tosaf CEO Amos Megides established the company in Israel in 1986, and still stands at its head, leading and inspiring his team to always uphold the following three pillars:

Tosaf's major shareholders include:  
Megides Holdings Ltd. & the Ravago Group

## COLOR EXPERTISE

Tosaf is your one-stop-shop for color masterbatches, taking a coordinated approach to deliver creative solutions that meet all your color, functional and compliance needs.

With a long track record of color development and one of the highest number of sales people and technicians of any competitor in our field, we have the expertise and technical capability required to produce an exact color match quickly. In fact, we currently match and produce 150 color masterbatches each week.

Having forged partnerships with customers across all relevant industries, we enjoy close ties to their in-house development departments. This coordinated approach ensures that we understand the technology and product lines of our customers. Whether injection molding, blow molding or extrusion, we will advise you on what is possible and push the boundaries to create the precise solution that works for you.

## INDUSTRY APPLICATIONS

### AUTOMOTIVE

As one of the preferred providers of tier-1 producers worldwide, we produce masterbatches for all the large automotive brands. Our colors are used in interiors, exteriors and electrical parts. With more than 500 running OEM colors and a deep understanding and extensive experience of the specific requirements of the automotive industry, we are not only a valued partner, but one of the market leaders in this field. In fact, 50% of cars manufactured around the world today use Tosaf red masterbatch in their seat belt push button.

### ELECTRICAL & ELECTRONIC

Differentiation in design and style is essential in creating consumer appeal for electronic and electrical goods. As a leading supplier of color, black and functional masterbatches, we are the partner of choice to the electrical and electronics sector.

### PACKAGING

Our color masterbatches are used across a wide range of packaging applications. In food packaging, we have developed many brownish and golden colors for use in thermoformed plastic packaging used by cookie and chocolate brands. Our masterbatches for caps & closures contain special non-warping pigments and slip additives for easy opening. In the cosmetics market, our kneading technology ensures the soft production of effect pigments, resulting in brilliant silver and gold colors. Our optimized production times and processes allow us to deliver color masterbatches quickly, effectively at a competitive price. Combined with our raw material knowledge, this enables us to be one of the few global suppliers of the well-known blue barrels or industrial-sized waste containers. We are also one of the global leaders in the crates market, serving nearly all food & beverage companies.

### HOME, SPORT & LEISURE

The Home Sport & Leisure market must adapt quickly to changing trends and customer demand. From our extensive experience, we know the importance of understanding the needs of designers. This is what enables us to help them turn their dreams and ideas into reality, taking into account all their specifications and compliance with relevant regulations. Using all available colorants, we can obtain a match with any color of the visible spectrum. Moreover, we can also provide visual effects such as fluorescent, metallic or pearlescent, to give excellent gloss or shine.

### TEXTILE & FIBER

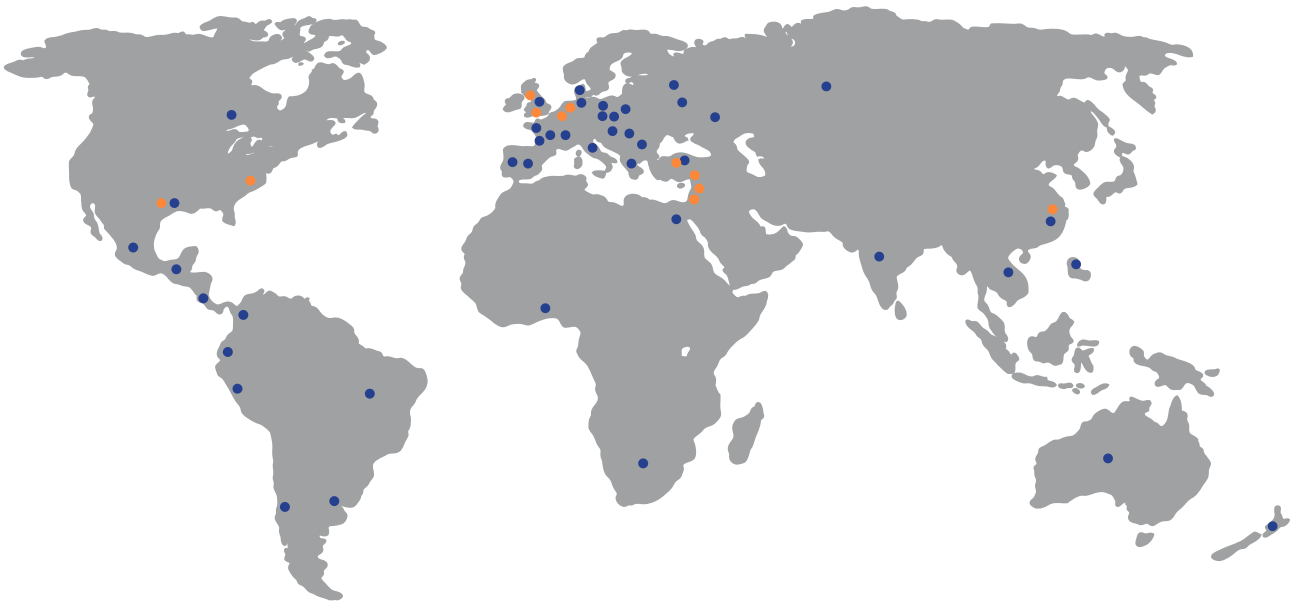

Non-woven, carpet and raffia fibers in particular have a wide range of applications in modern life. Our extensive experience in synthetic fibers allows us to develop a wide range of colors and value-adding additives, and even create new fashions for tailor-made products, all of which can improve the quality of our clients' products. For a color masterbatch to be suitable for this application, it must contain pigments with high light fastness and weatherability, and high dispersion to avoid tears in the fabrics. Our high-quality color masterbatch gives producers these qualities.

### AGRICULTURE

In agriculture, color masterbatches are actually considered to be additives, differentiated by their unique ability to reflect, absorb or transmit specific sections of the light spectrum according to the required specification. Our unique range of colors for agriculture have performance characteristics such as high durability, high stability, and ease of processing.
